User Stories

- 1. Parking spaces availability:** As a student, I want to see which parking lots have spaces available and how many each has.
- 2. Push Notifications:** As a user, I want to get notifications that alert me when a parking lot on campus is full so I know to avoid trying to park there.
- 3. Directions and location:** As a user, I want to see the fastest directions to the parking lot so that I can be more time efficient.
- 4. Schedule input:** As a user, I want to be able to find parking locations based on my class schedule and find the closest parking lot and/or space to that building.
- 5. Parking trends:** As a user, I want to know the busiest times and most available times of when to park.
- 6. Info page (TAPS):** As a user, I want to check information regarding TAPS and contact information.
- 7. Menu:** As a user, I want to choose which options to select when first opening the app so I can choose which user interface is better and easier to understand.
- 8. Map View:** As a user, I want to see a map view of the buildings in relation to the campus parking lots.
- 9. Save my parked location:** As a user, I want to be able to save my parked location so that I can remember where I parked once I get out of class.
